

Pupil Deployment Update

As we reach a very exciting time in the Connected Falkirk project we want to make sure that all families and pupils are fully informed about forthcoming pupil deployments. Schools will share the specific dates and details of how each pupil will receive their device as deployment dates are confirmed.

The Connected Falkirk project will provide a number of shared devices for all Primary 1 - Primary 5 classes to use in school, as well as a device for every pupil in P6 - S6. As part of this transformational project, all pupils receiving a device will have equity of access and a consistent device to support their learning. Each device will have the same security and filtering features to keep pupils safe.

Due to the timing of the deployment in the school year we will be deploying to pupils based on their stage for session 2021/2022, with current P7 pupils receiving their device when they start secondary school in August 2021.

For those pupils who already have a Connected Falkirk device, please ensure that they bring it with them on their deployment day in order for it to have additional functionality enabled.

To ensure P6-S6 pupils are able to access the full range of benefits their device will bring, they will be responsible for bringing their device to school every day, fully charged.

All of this information is available in more detail through the Connected Falkirk website:

- [Acceptable Use Policy](#)

We look forward to working with all pupils during the deployment days.

The Connected Falkirk Team
